

Replace manual work with software built for your business

Innovate • Integrate • Elevate

www.aarvitechnology.com

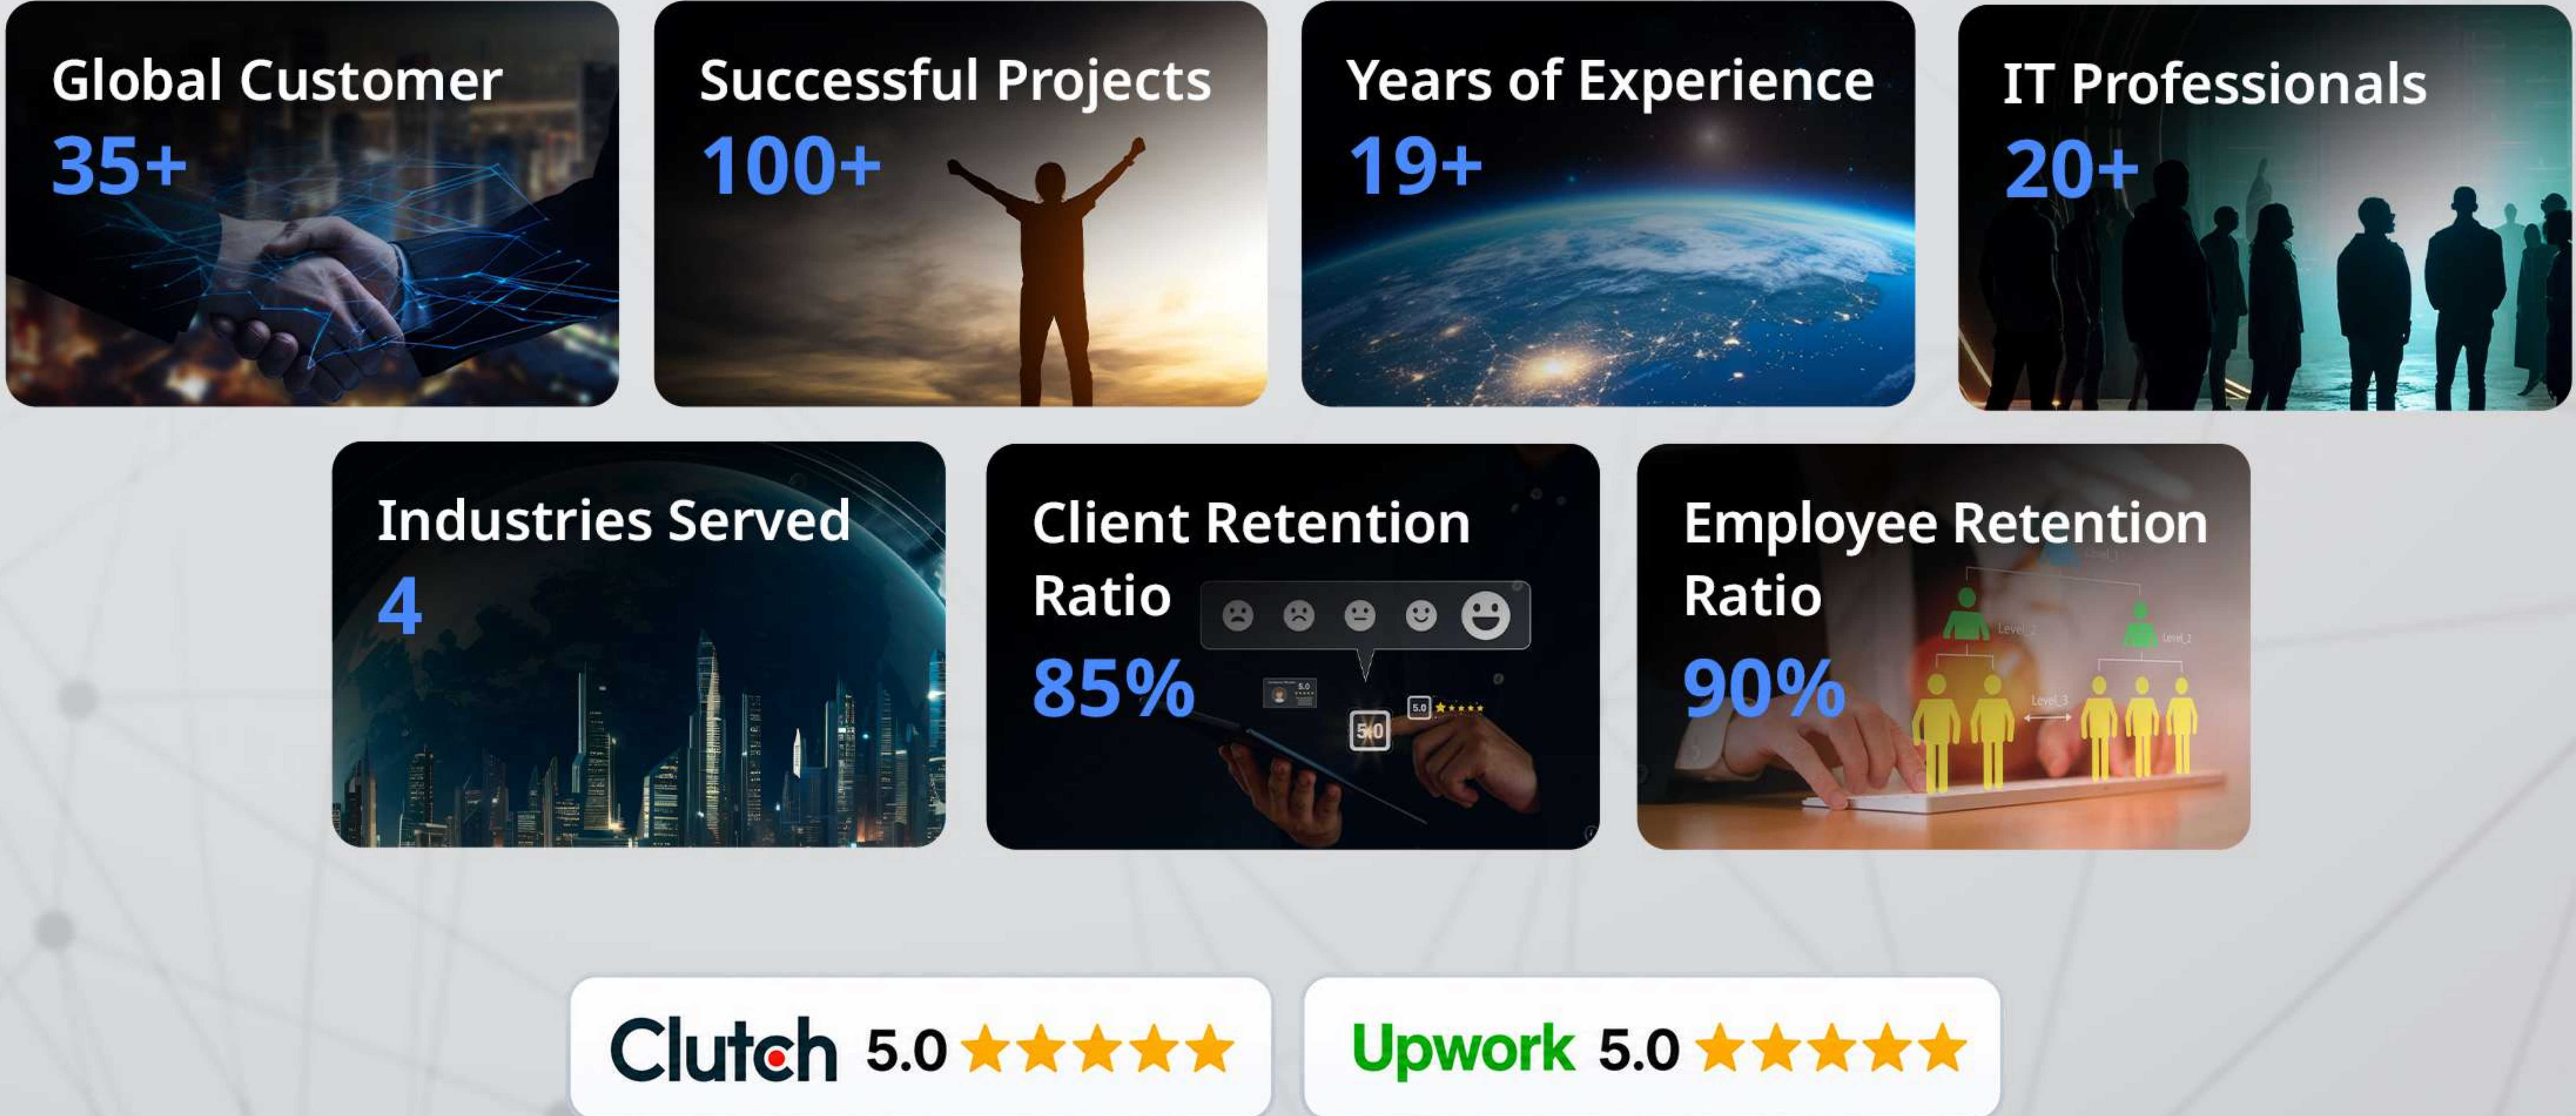

WHO WE ARE —

Aarvi Technology is a software company in Surat, Gujarat. We build custom ERP systems, SaaS platforms and AI automation for businesses that have outgrown spreadsheets, paperwork and sconnected tools. We start with how your business works today, then build or modernise the software around it. After launch we stay on for support, so the system keeps up as you grow.

Since 2015, we've helped businesses replace manual work and ageing systems with software that fits how they operate.

STATISTICS —

GLOBAL REACH —

CORE FOCUS AREAS

Driving Business Growth Through Technology & Innovation

At Aarvi Technology, we specialize in solving real-world business challenges through innovative, scalable and future-ready digital solutions. Our core focus areas reflect our commitment to excellence and our deep expertise in modern technologies that empower businesses to thrive.

AI Automation

We automate lead follow-up, customer queries, document processing, record updates and reports, working with the CRM and ERP you already use, so your team spends less time on repetitive work and more on customers.

Digital Transformation

We help businesses redefine operations and customer engagement by integrating AI, cloud, automation and data analytics into their core systems, ensuring agility, efficiency and innovation.

App Modernization

Legacy to leading-edge. We upgrade and modernize outdated applications with modern architectures, UI/UX enhancements and secure, scalable solutions that align with future business goals.

SaaS Platform Development

We build custom, cloud-based SaaS platforms that offer flexibility, scalability and performance. Our platforms simplify complex processes and deliver exceptional user experiences with secure and seamless access from anywhere.

IT Consulting

With deep industry knowledge and technical expertise, we guide businesses through digital strategy, IT infrastructure optimization and cost-effective technology planning to support long-term success.

Additional Services

The services that keep your systems running and connected after the main build, whether we built them or not.

OUR STORY —

Founded in 2015, Aarvi Technology began with a focus on the e-commerce industry, quickly recognizing the evolving needs of businesses in the digital space. As we grew, we shifted our focus to app modernization, digital transformation and product development, helping numerous clients enhance their business effectiveness. Our unique approach to solving complex business problems has allowed us to become more than just an IT firm—we define ourselves as problem solvers, committed to driving innovation and growth for our clients.

Our Vision

To be recognized globally as a trusted leader in IT solutions, known for delivering innovative, scalable and future-ready services. We aim to empower businesses by providing cutting-edge SaaS platforms, digital transformation and product development, helping our clients solve complex challenges and achieve sustainable growth in an ever-evolving digital world.

Our Mission

To make our customers happy by delivering innovative solutions that drive growth and solve problems, while continuously enhancing our expertise. We strive to build long-term partnerships by combining our knowledge with a commitment to excellence, ensuring lasting value and customer satisfaction in an ever-evolving digital world.

WHY AARVI TECHNOLOGY?

Built around your business goals

We start with the result you need, such as faster orders, fewer errors or clearer reports, and build only what moves it.

One partner, start to finish

Audit, design, build, rollout and user training come from one team, so nothing gets lost in handovers.

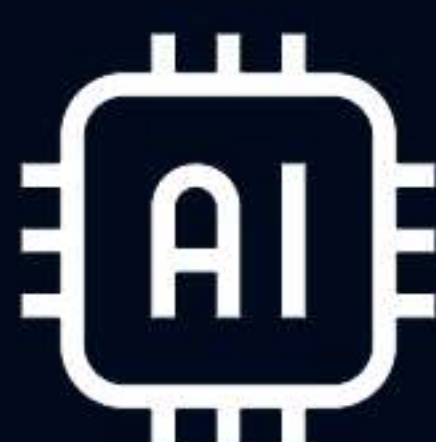

Upgrade, don't rebuild

We keep what works in your current system and modernise the rest, saving time, money and risk.

SaaS products, built lean

We build secure, multi-tenant SaaS platforms in short cycles, from first release to scale.

Automation from day one

Every project looks for manual steps to automate and places where AI can help.

Consulting that ships

Our advice comes with a plan and when you want it, the team to carry it out.

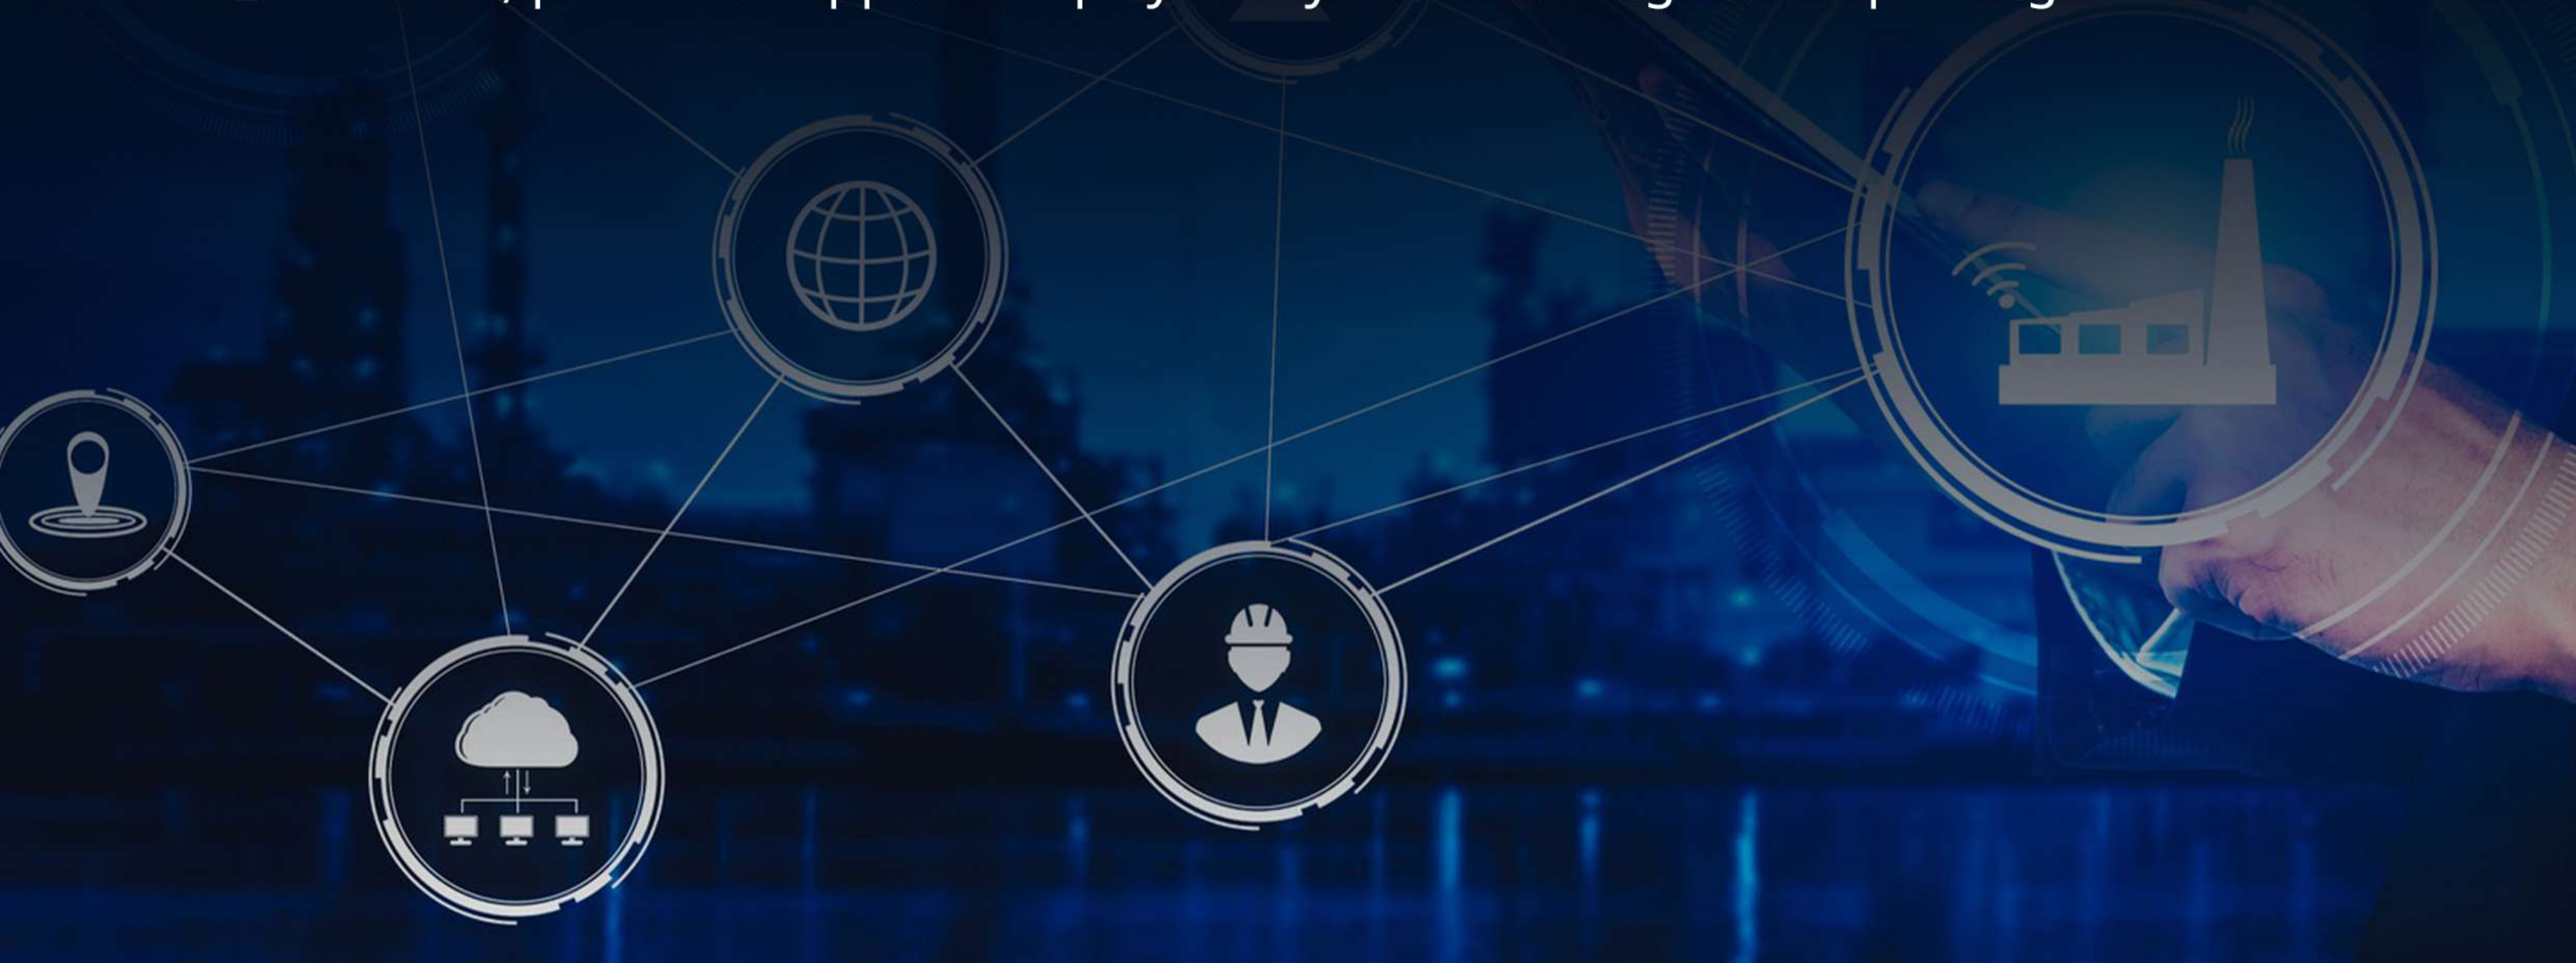

Proven across industries

Manufacturing, real estate, healthcare, retail, education and more.

Support after launch

Fast, personal support keeps your system running and improving.

CLIENTS WE LOVE TO SERVE

Empowering Visionaries Across Industries and Sizes

At Aarvi Technology, we work with forward thinking organizations that recognize the value of technology in transforming their operations and unlocking new opportunities. Our solutions are designed to serve a diverse set of clients who seek innovation, efficiency and growth.

Small and Medium Businesses (SMBs)

Companies looking to scale without the burden of high infrastructure costs, we provide affordable, all-in-one platforms that grow with you.

Enterprises Undergoing Digital Transformation

Established organizations aiming to modernize legacy systems, integrate cutting edge technologies and enhance customer experience.

Startups & SaaS Founders

Entrepreneurs seeking end-to-end product development from idea validation and MVPs to scalable SaaS solutions built for long term success.

Industry-Specific Clients

We cater to key sectors like:

- ▶ Manufacturing
- ▶ Real Estate
- ▶ Jewellery & Retail
- ▶ IT & Service Industries

Consultants & IT Decision Makers

IT leaders and consultants looking for a trusted partner to support integration, security, infrastructure and performance optimization.

If You Value Innovation, You're Our Audience

Whether you're just starting out or scaling up, we align with organizations that want to lead, not follow, in the digital age.

Pain Points Solving

From Obstacles to Opportunities

Solving the everyday problems that limit growth, speed and innovation.

Disconnected Systems & Data Silos

We unify systems and workflows, enabling seamless data integration and better decision-making.

Legacy Applications Holding You Back

Our modernization services upgrade outdated software into scalable, high-performance platforms.

Operational Inefficiencies

We automate manual processes and reduce redundancies to improve productivity and ROI.

High Infrastructure Costs

Our cloud-based SaaS models eliminate the need for large upfront hardware investments.

Poor Customer Engagement

We implement intuitive interfaces and smart CRM integrations that elevate customer experience.

Inefficiency Due to Outdated Systems

We replace legacy tools with optimized, future ready applications that drive business efficiency.

Slow Time to Market

Our agile development and rapid deployment practices help you launch products and features faster.

Fear of Poor Delivery or Tech Failure

With rigorous testing, dedicated account management and ongoing support, we deliver reliable and high-quality solutions.

Complexity in Digital Decision Making

We provide data-driven insights and simplified dashboards that empower confident strategic choices.

At Aarvi Technology, we don't just offer services we solve the root problems holding businesses back.

SERVICES —

AI Automation

Put Your Repetitive Work on Autopilot and Give Your Team Their Time Back

AI Automation uses artificial intelligence to run everyday business tasks on their own: routing leads, answering customer queries, processing documents, updating records and generating reports, without waiting for someone to do each step by hand. It works with the CRM and ERP you already use, so your core systems usually don't change. Most clients start with one workflow and expand from there.

Why Choose AI Automation?

Work That Never Stops

Response Times
Measured in Seconds

The Same Result Every
Time

Growth Without Added
Headcount

Lower Operational Costs

Your Team Back on
Work That Matters

Why Us?

Aarvi Technology starts with how your business really works, not with a template. We find the tasks that quietly take up the most hours, such as lead follow-up, data entry, document checks and reporting, and build AI-driven workflows around them. Every automation is tied to a number agreed upfront, such as hours saved, response time or error rate, so its value is visible. It connects to the systems you already run, handles the awkward real-world cases as well as the clean ones, and comes with plain-language documentation and training for your team. After go-live, one team looks after monitoring, fixes and improvements.

**Find Out What You Can
Automate: Free Assessment**

[Discover More →](#)

Benefits of AI Automation

AI Automation gives your team back the hours spent re-typing, chasing and double-checking. Leads and customer queries get an answer in seconds, at any hour. Processes run the same way every time, without skipped fields or mistyped figures. When enquiries or orders double, the automation absorbs the extra volume without new hires, and the cost per invoice, enquiry or record falls as you grow. Your data stays secure, with access controls built in, and your first automation goes live in weeks rather than quarters while the rest of the roadmap is built.

Digital Transformation

Embrace the Future with Tailored Digital Solutions That Drive Innovation and Growth

Digital Transformation is the integration of digital technology into all areas of a business, fundamentally changing how you operate and deliver value to customers. It involves a cultural shift that requires organizations to continually challenge the status quo, experiment and get comfortable with failure.

Why Choose Digital Transformation?

Business Agility

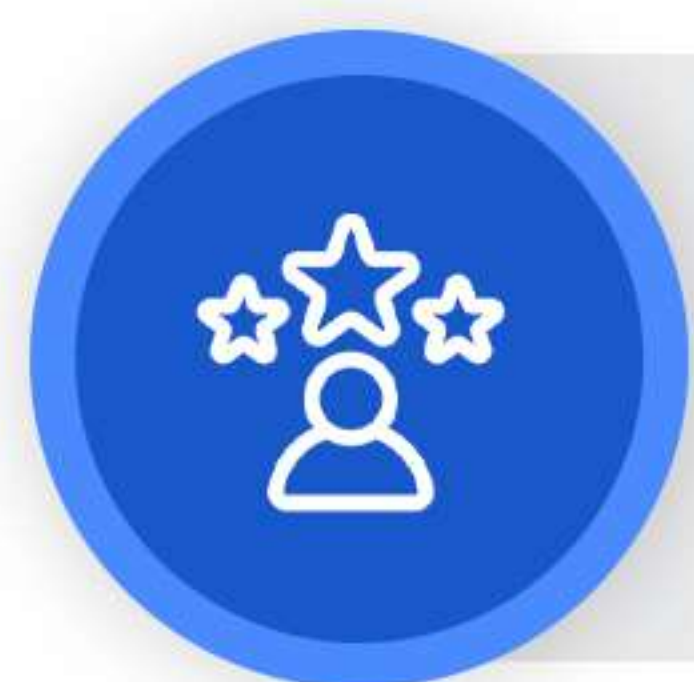

Data-Driven Decisions

Innovation and Growth

Operational Efficiency

Enhanced Customer Experience

Why Us?

Aarvi Technology stands out for its expertise in crafting tailored digital strategies that align with your business goals. By integrating advanced data analytics, AI and cloud solutions, we help transform operations and drive innovation. Our capabilities in IoT integration, automation and cybersecurity ensure your digital assets are secure, scalable and optimized for efficiency. We also focus on enhancing customer experiences and building a culture of digital innovation within your organization. With Aarvi Technology, you gain a partner committed to helping you thrive in the digital age.

App Modernization

Revitalize Your Legacy Applications for Enhanced Performance and Future Growth

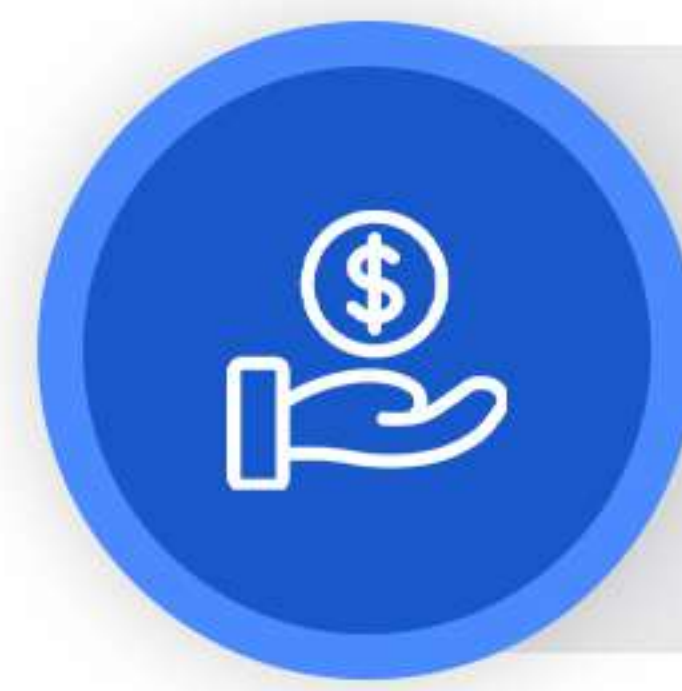

App Modernization involves upgrading and enhancing legacy applications to align with current business needs, improve performance and leverage modern technologies. This process ensures that your applications are efficient, scalable and capable of meeting future demands.

Why Choose App Modernization?

Enhanced Performance

Cost Savings

Improved Security

Scalability

Innovation

Why Us?

We are your ideal partner for app modernization, offering expertise across all critical areas of the process. We begin with a thorough assessment of legacy systems to identify opportunities for enhancement. Our expertise in cloud migration, microservices architecture and DevOps integration ensures your applications are scalable, flexible and optimized for performance. With a focus on UI/UX improvements, advanced security protocols, seamless data migration and continuous feedback, we deliver modernized applications that meet current demands while future-proofing your business for continued success.

SaaS Platform Development

Build Scalable, Custom SaaS Platforms That Drive Your Business Forward

SaaS (Software as a Service) Platform Development involves creating cloud-based applications that are accessible via the internet. These platforms eliminate the need for businesses to install and maintain software, as everything is hosted on remote servers. Users can access the software through their web browser, allowing for flexibility, scalability and cost-efficiency.

Why SaaS Solution?

Businesses should consider developing SaaS solutions to improve efficiency, scalability and accessibility. SaaS platforms offer cost-effective, flexible subscription models that eliminate the need for expensive infrastructure, making them ideal for businesses of all sizes. These solutions enable seamless remote access, automatic updates and enhanced collaboration, allowing teams to work efficiently from anywhere. SaaS also offers built-in security, compliance and customization, ensuring data protection and adaptability to market demands. With faster time-to-market and sustainability benefits, SaaS solutions help businesses stay competitive and innovative.

Why Choose Aarvi Technology for Your SaaS Platform Development?

Aarvi Technology delivers customized, scalable SaaS platforms designed to enhance business efficiency and performance. With our expertise in rapid development, seamless integration and advanced security, we ensure your platform stays ahead of the competition. Our solutions focus on providing an excellent user experience, data-driven insights and continuous support, making us the ideal partner for your SaaS platform development needs.

How We Work —

Know How We Deliver Excellence at Every Step

1. Requirement Gathering

We begin by thoroughly understanding your needs and objectives to ensure all project details are clear.

2. Requirement Analysis

We conduct a detailed analysis and feasibility study to ensure that the proposed solution is technically and financially viable, identifying the most effective strategies for implementation.

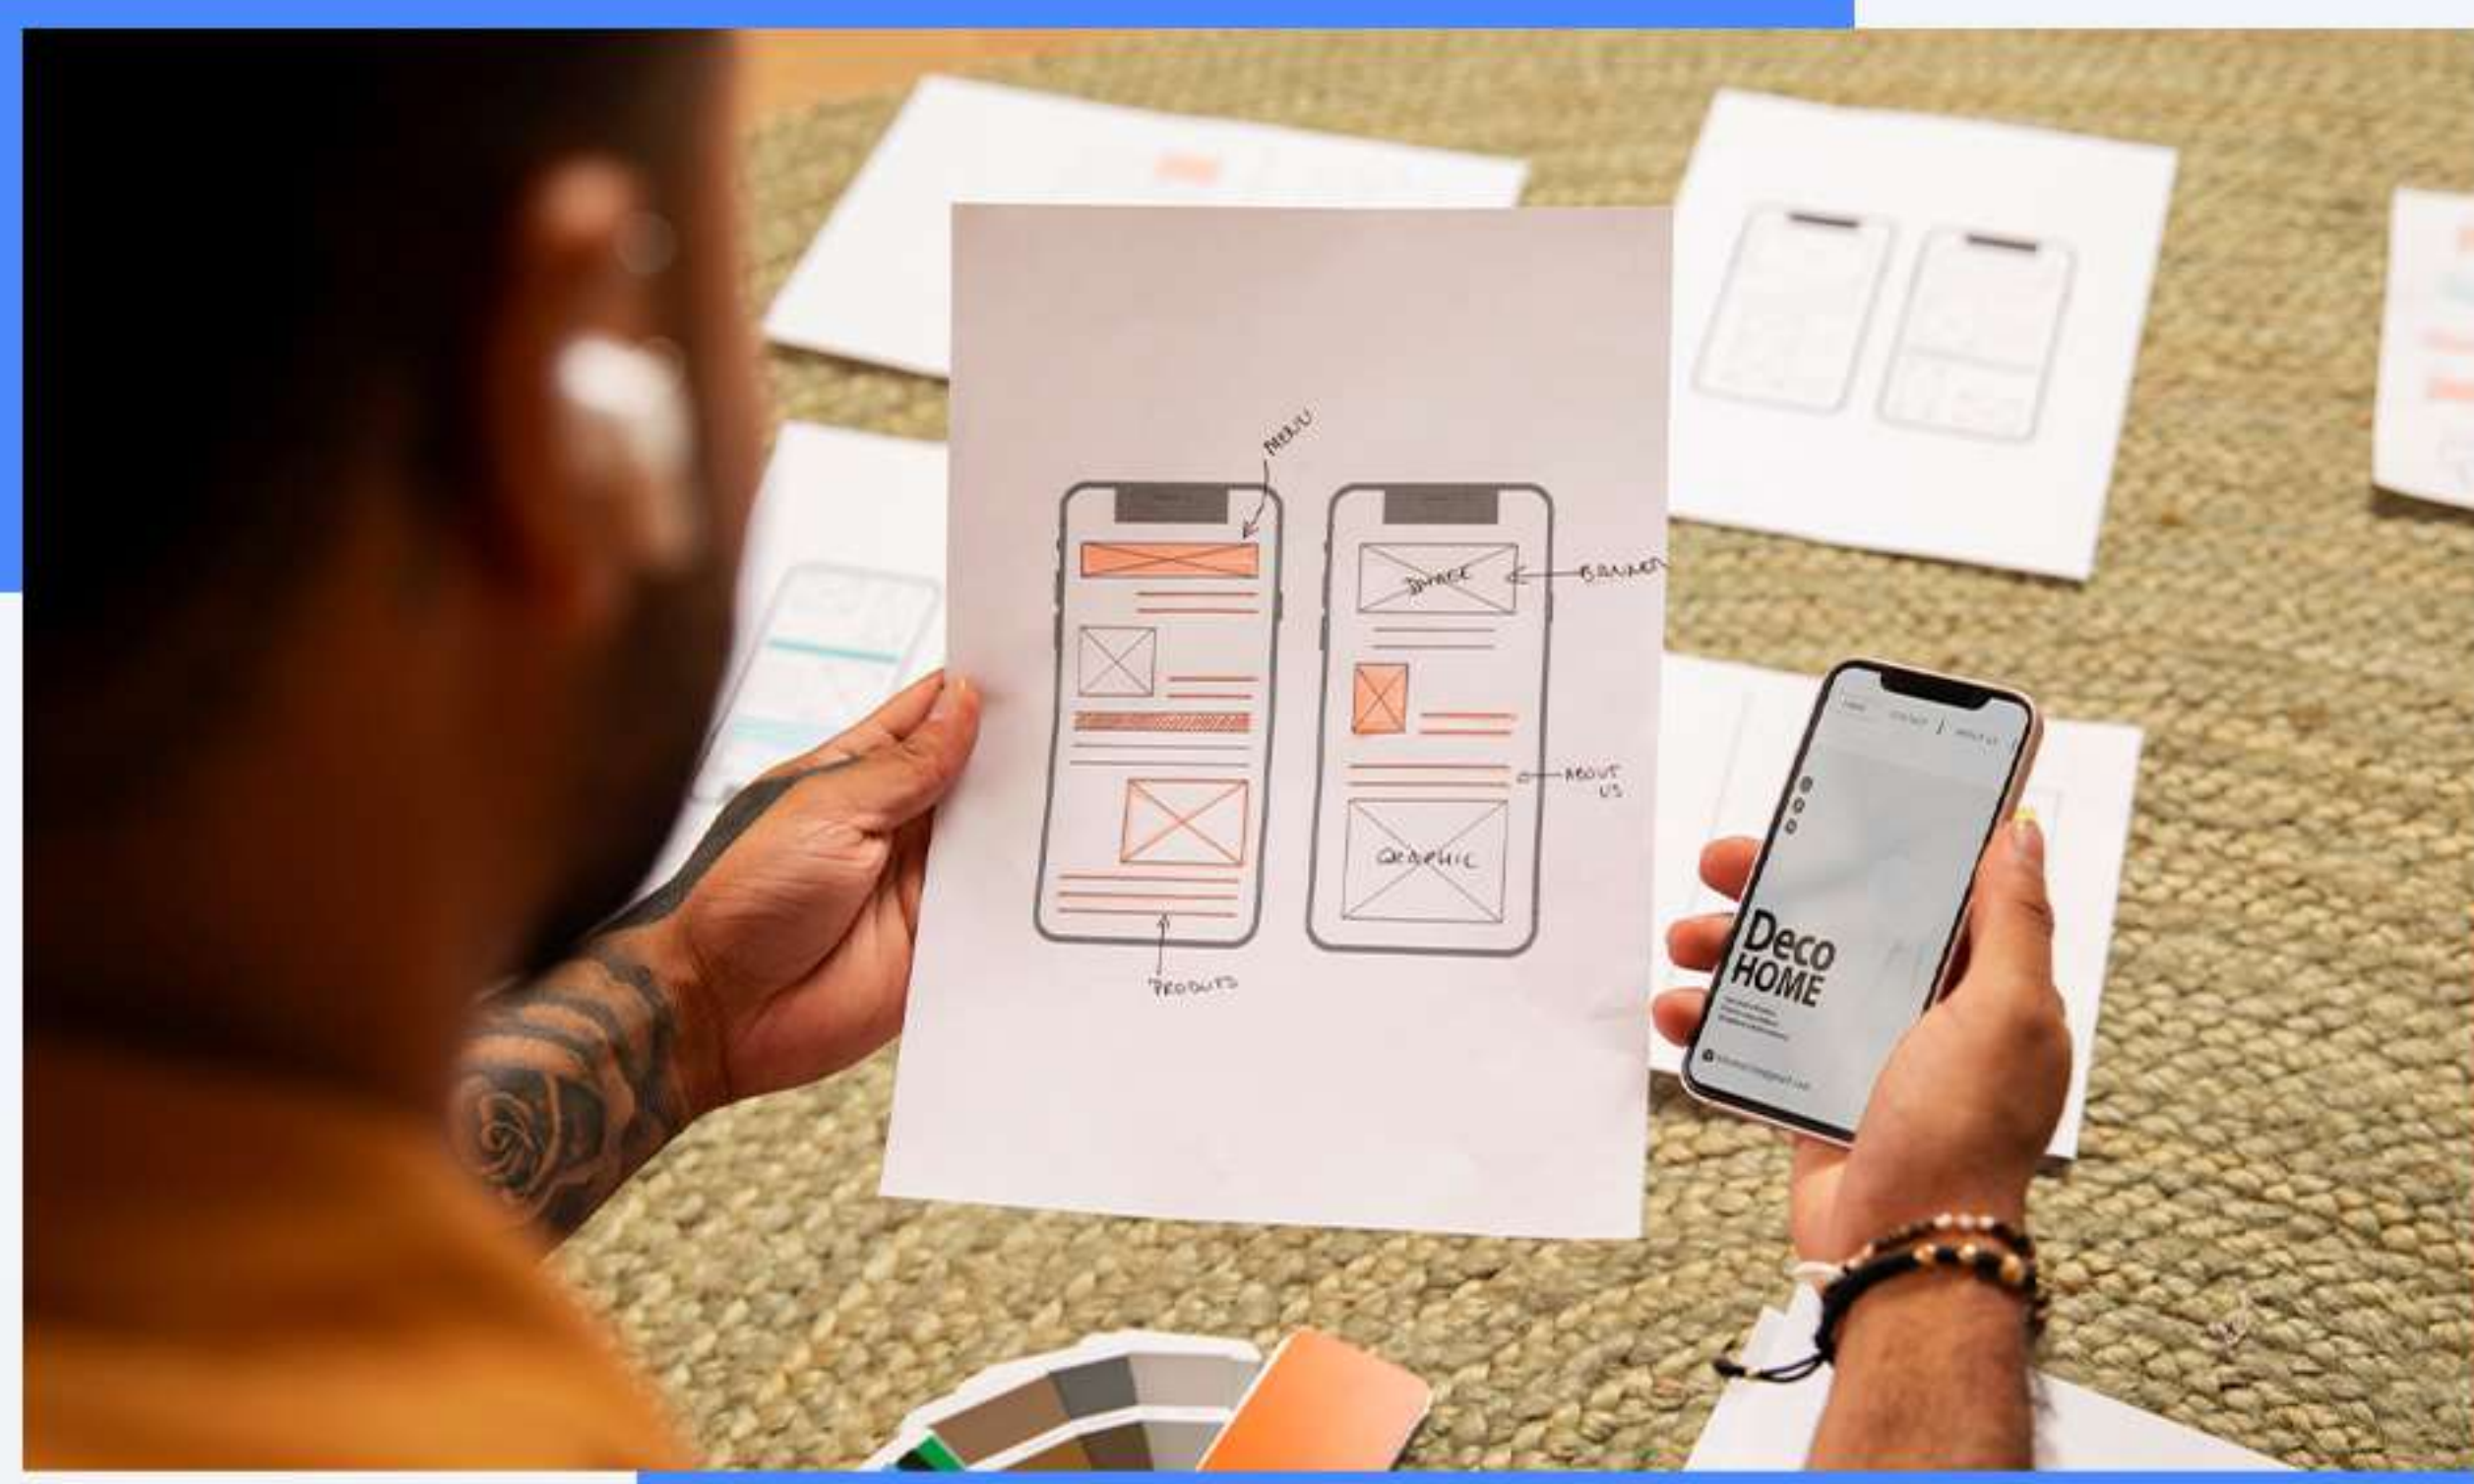

3. Providing Timeline and Quotation

We present an accurate timeline and a transparent quotation for the project.

4. Providing Technical Specification

Detailed technical documentation is prepared to outline the entire solution.

5. Providing User Interface

We design a user-friendly interface that aligns with your brand and enhances user experience.

6. Development

Our developers build the solution with precision and efficiency, adhering to best practices.

7. Discussion

Regular communication ensures you're updated on progress and any feedback is implemented.

8. Testing

We rigorously test the solution to ensure functionality, performance and reliability.

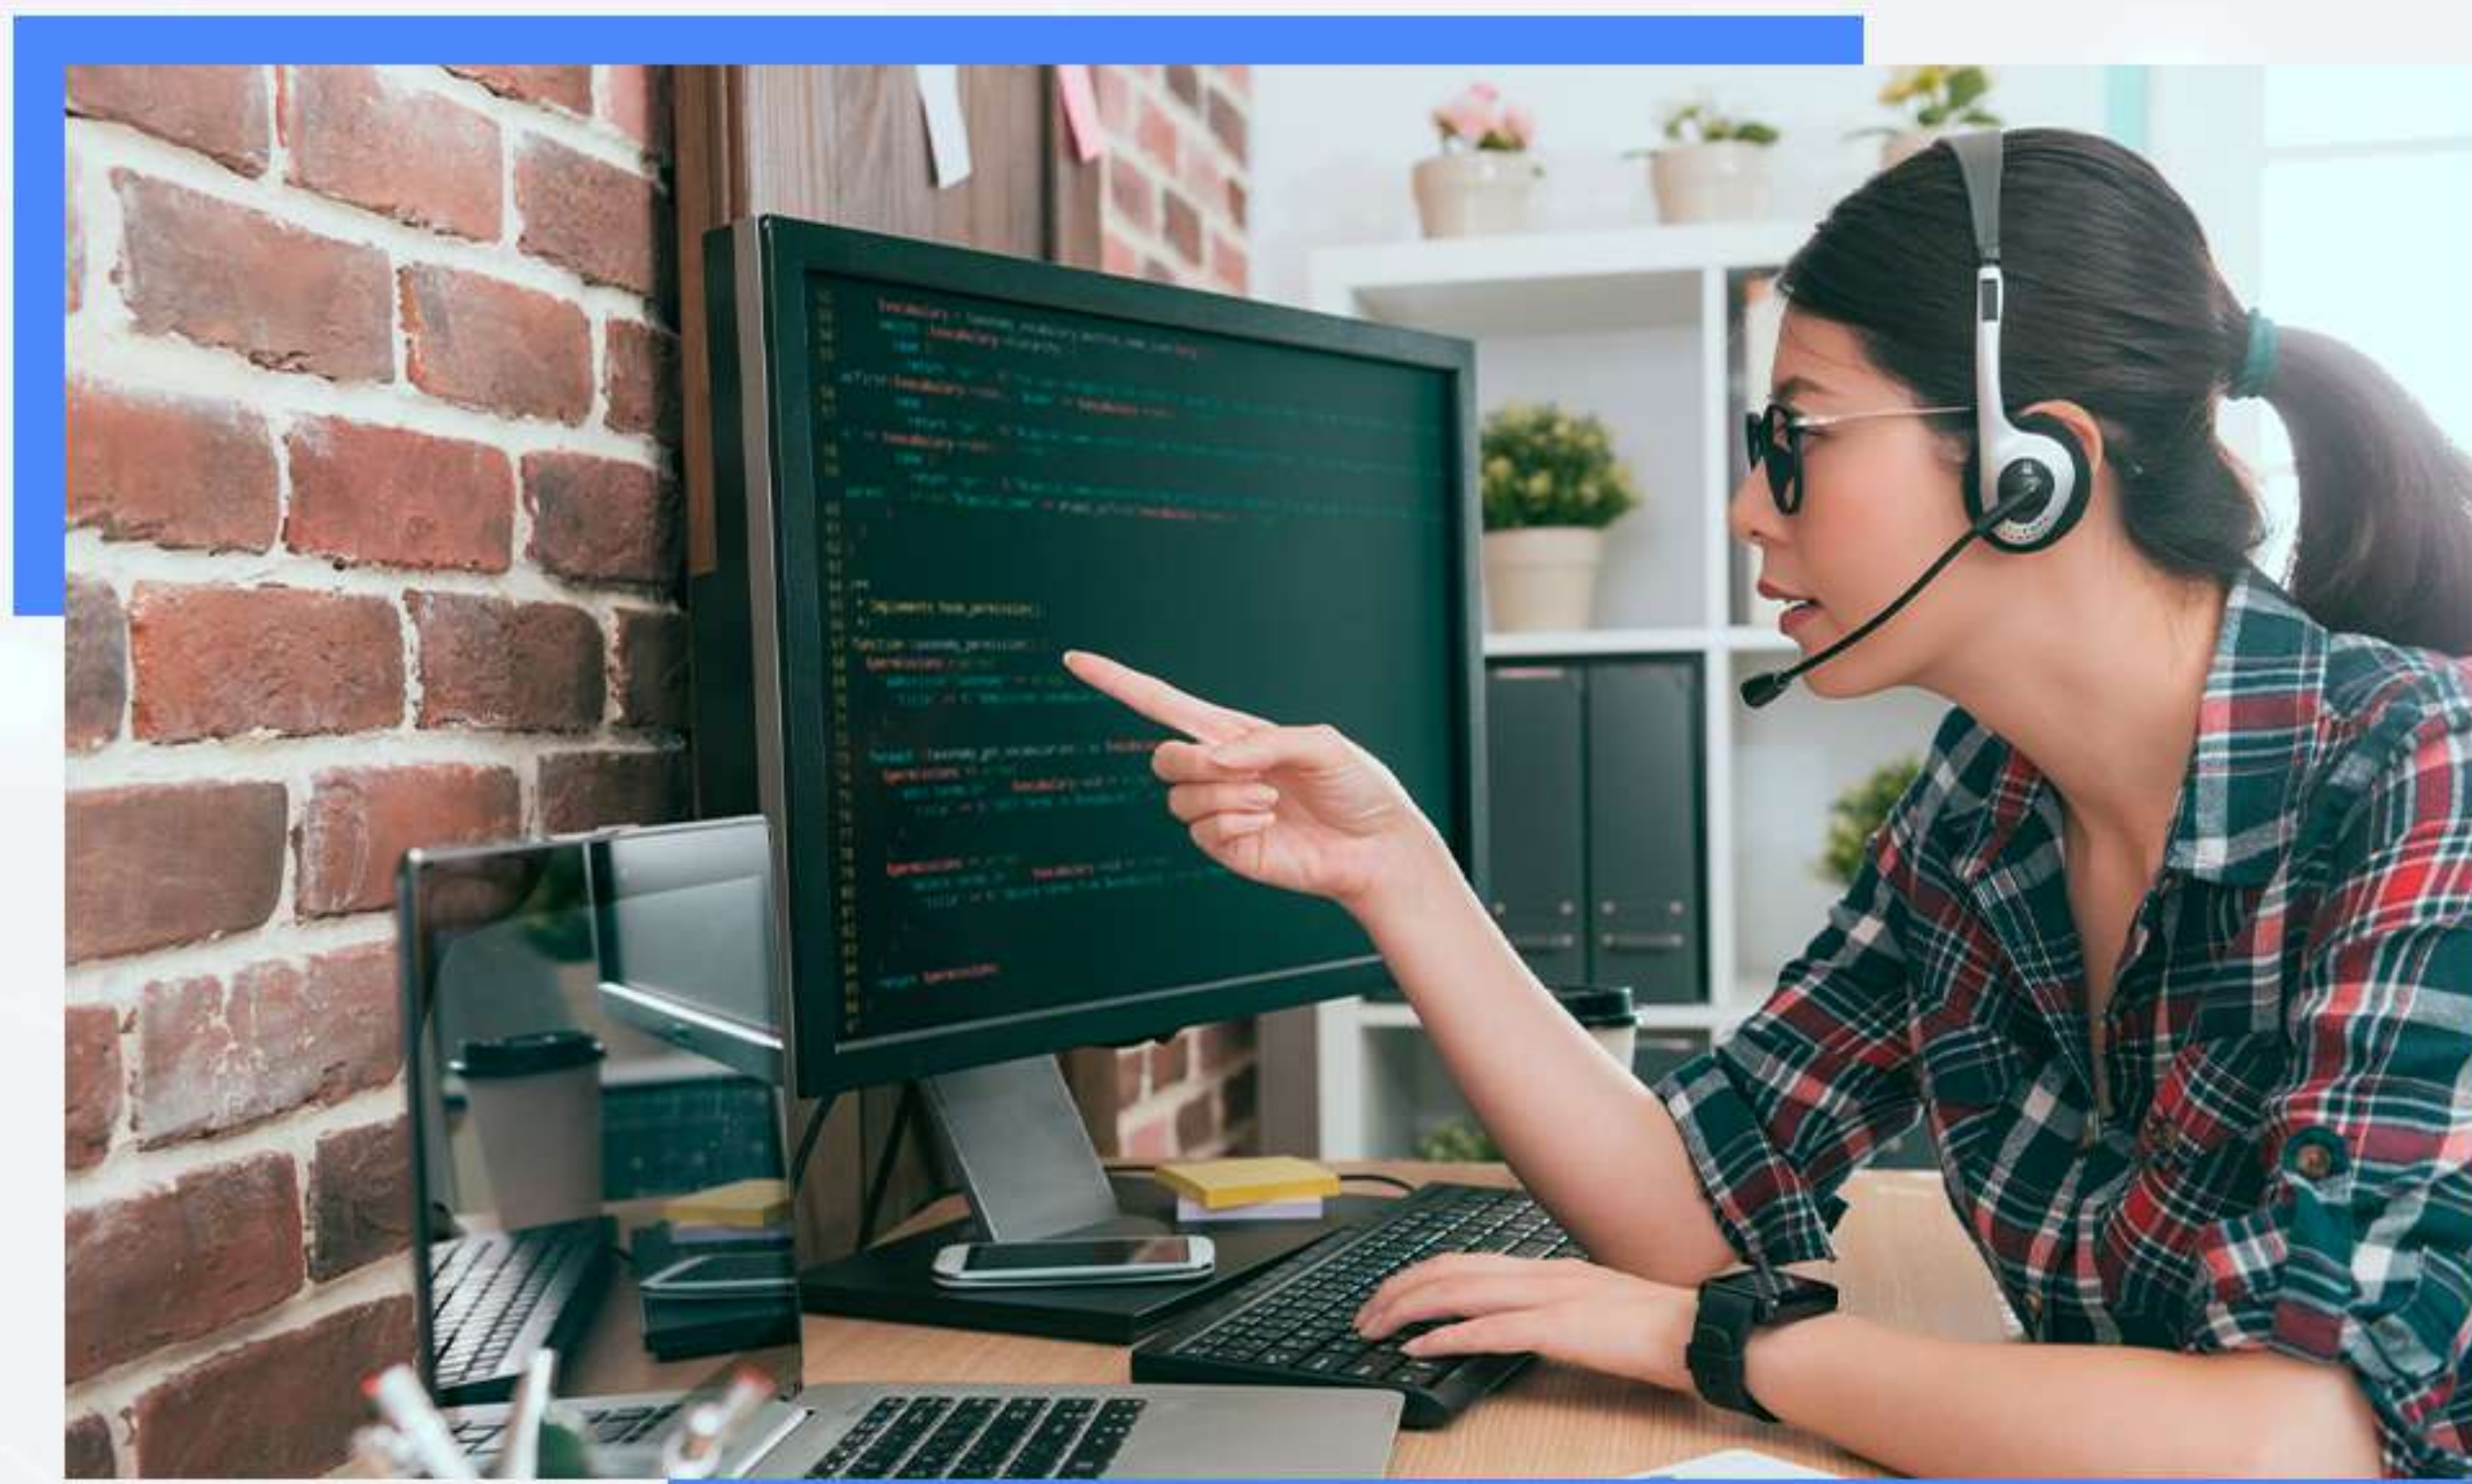

9. Delivery

The final product is delivered on time, fully tested and ready to use.

10. Implementation

We assist in seamlessly implementing the solution into your business environment.

11. Manage Support

Ongoing support ensures your system runs smoothly and any issues are resolved quickly.

12. Success

We measure success by your satisfaction, ensuring the solution meets your goals and continues to drive value.

Client Account Management

At Aarvi Technology, our approach to client account management is built on a foundation of trust, communication and proactive service. Most client projects are led by one team leader from start to finish, so you always know who to call.

Key Responsibilities of the Account Manager

Strategic Partner

Your account manager deeply understands your business objectives, industry challenges and technology needs. They act as your strategic partner, helping you leverage our solutions to meet your goals and scale efficiently.

Personalized Service

We prioritize personalized interactions, ensuring that every solution and service is customized to fit your unique business needs. The account manager keeps track of your preferences, making sure that our services evolve with your business.

Proactive Communication

Clear, open communication is essential for success. Your account manager provides regular updates on project milestones, resolves queries swiftly and coordinates between teams to ensure you're always in the loop.

Problem Resolution & Support

When challenges arise, your account manager is your first line of defense. Whether it's technical issues, strategic adjustments, or service-related concerns, they ensure rapid problem resolution and escalate matters as needed for fast and efficient support.

Get Started with Aarvi Technology

Imagine a world where technology isn't just a tool but a catalyst for your business's success. At Aarvi Technology, we don't just deliver solutions, we create opportunities. Whether you're looking to modernize your apps, streamline operations, or embark on a digital transformation journey, we're here to elevate your business. Let's take that first step together toward innovation and growth.

**Take the first step toward innovation,
let's discuss how we can help you succeed.**
